Supplementary Figure 2. Patient recurrence rate curve stratified by AFP (A), AFP-L3 (B), DCP (C), NLR (D), and PLR (E).

AFP: alpha-fetoprotein; AFP-L3: lens culinaris agglutinin-reactive fraction of alpha-fetoprotein; DCP:
des-gamma-carboxy prothrombin; NLR: neutrophil-to-lymphocyte ratio; PLR: platelet-to-lymphocyte ratio.
